Business Insurance

California is home to a broad range of businesses. From Property Owners, to Manufacturers, From Restaurants to Retailers. We have been working with businesses in California for over 40 years. During our 40 years of insuring businesses, we have learned that it is important to look at each business as a unique operation with a unique set of coverage needs. Let us design and insurance program for your business that will meet your coverage needs.

Our Goal For Your Insurance Program

Each business in California offers its own distinctive service or product. The insurance for your business should be not different. We strive to offer insurance that:

- Will Meet the specific coverage needs of your Business
- Provide the customer service you need so that you can focus on your business, not your insurance
- Provides coverage at a competitive price that offers your business the best possible value.

Gaps in Coverage

As mentioned previously, each business has it's own unique operations. Unique business operations tend to have exposures that are not common to other industries. When designing your insurance program we will work to identify exposures that could be most financially damaging to your business. Once these exposures are determined, we will design an insurance policy that will cover as many of your exposures as possible.

Exposure Which May Not Be Covered By Your Current Policy

Your business relies heavily on its equipment and machinery, and utility services to produce operate as efficiently as possible..

Should your business loose it's power supply, water supply, or have a sudden breakdown of its equipment, how much money would your business stand to loose?

We have available a reasonably priced coverage solution for this situation and many others unique to various classes of business.
